If you have not yet visited the Utah Chapter of ICC website, you might be as surprised as I was to find all the information that is available. If you have a question about gypsum, flooring, masonry or plumbing, you can find code links for everything from architectural to wood trusses. You can also find membership registration; members contact information, permit tech committee contact information and current city and county job listings.

**MISSION STATEMENT**

The Utah Chapter of the International Code Council is dedicated to promote public safety by providing education, training and support to its members. The Chapter will work hand in hand with industry and the public for the enhancement of professionalism and uniformity in code enforcement and administration, to improve the safety of building construction in the great State of Utah.

After browsing through some of the Utah ICC galleries, I’m confident to announce that we are NOT the wildest committee in the Utah chapter. However, we do have the permit tech seminar coming up and from what I understand; the committee is putting together another eventful seminar for 2017. Congratulations to our Utah chapter celebrating 50 years of building code enforcement and a special thanks to all the permit techs that made it happen!

56 North State Street

Orem, Utah 84057

The Utah Chapter ICC is always looking for interested members to serve on various committees.

If you would like to participate please contact any Utah Chapter ICC board member. For a list of board members and committees go online at www.utahicc.org and click on the members tab.
As I reflect back on the past year as the Permit Tech Committee Chair I can’t help but be so grateful for the ladies I serve with on the committee and how awesome they all are. We are able to meet to put together study groups and plan the annual Permit Tech Seminar, each one dedicating their time and talents so that we as Permit Technicians across the state can learn and grow in our jobs and as people in the industry. The seminar this past March in Logan is a great example of us all coming together to be taught by our peers to expand our knowledge and learn from one another. If you are able I would urge you to join the committee. I feel I have been better at my job, have gained long lasting friendships and have had the support of these members when I have a question about something in my position I don’t know how to handle. Quite a few of the committee members have been serving for a long time and it would be great to get new people involved so we can continue to shape and mold the trainings going forward in the future.

This past year saw the stepping down of Cathryn Nelson. As most of us know Cathryn has been in the industry for a long time and has been an integral part of the committee being what it is today. She has gone from starting out as a Permit Tech, Inspector and now Building Official of Herriman City. She also helped to organize the Permit Tech Committee and has served on both the Committee and as the President of the Utah Chapter. We will all miss her knowledge and example to us at seminars in the future. I would also like to thank Patricia Abdullah from the Town of Vineyard. Patricia has served on the committee for a little over a year now and due to how busy her jurisdiction is, and her responsibilities there, has needed to step down from the committee as well.

Your new committee chair for 2016-2017 will be Doreen Bowers-Irons. Doreen has been working in the Building/Planning field since she started working for Donna Jackson in 1999. In 2011 she moved to St. George to work for Washington County in the Community Development department under Kurt Gardner and has been on the committee ever since. In 2012 she passed the Permit Tech exam (which she had to drive to Las Vegas during the hottest part of the year and she didn’t even get to stay and play while she was there 😒) She has 3 grown children and 10 grandchildren that all live in the West Jordan/Riverton area that she misses very much. In her spare time she likes to read, go to concerts, garden, camp and do puzzles. Doreen has been a great asset to the committee all these years and I am confident she will shine as the new Committee Chair! I hope to see all of you in St. George this coming March.

Sincerely,

Melissa McDaniel
An Activity for Your Building Official

Across

1. Who your permit tech deals with so you don’t have to.
2. When a contractor calls your permit tech after a failed inspection, it’s to _______.
3. When a homeowner and contractor are in a dispute, you or your permit tech may have to attend one of these.
4. Something your permit tech would love for you to buy him or her this afternoon.
5. I wish my permit tech knew how to do _______ plan reviews.
6. Our plea, located next to the answers on page 6 of this newsletter.
7. What your permit tech did with the applications that are being reviewed.

Down

1. What your permit tech issues.
2. A gas line drawing.
3. What we spare you every day.
4. Contractors prefer to call your permit tech because he or she is _________.
5. The manner your permit tech uses to answers the phone.
6. How your permit tech makes your daily life.

**NOTICE**

Committee Members Needed!

If you are interested in joining The Utah Chapter Permit Tech Committee please contact Doreen Bowers-Irons at doreen.bowersirons@washco.utah.gov (actually, you could contact any one of the active duty committee members and we can help get you started)

We meet every two months at one of our municipal offices and according to some people, we just eat and laugh, but seriously we make things happen. You can find all of our contact info on page 7.

**Sentence 1**: Hello Ladies!

I have some regrettable news to share with you all...yesterday I accepted a job with Utah State University with one of their agricultural grant programs. It was slightly unexpected and I didn’t know about the opportunity until after our meeting last week.

Fortunately, it’s a great career opportunity; unfortunately, I will be leaving my job from Logan City after 6 years in the Building Department.

I wanted to let you all know how much I have enjoyed working on this committee. Being on the committee taught me a lot - how to coordinate an entire seminar with just a few short hours of planning, how to make decisions for a group as a whole, and the importance of staying in contact with those that help you do your job best. I do hope to keep up on my certifications, so as I get a new email, I will ask to be put on the mailing list, and perhaps even apply for the scholarship to attend at least one day of the seminar. (I know Hadlee is quite disappointed in not being able to go to St. George in March, so we have to make a trip there to see you!) It’s quite heartbreakingly to know I won’t be able to help with the seminar now or be a part of this planning process that has come to be part of my everyday routine. Every time I open my email and see a feed from you ladies, I know it's going to be a fun conversation leading up to a fun time!

~Nicole
